

Clinical Trials **Expenses**

Shouldn't **DETER** Participants

Clinical trials offer **TREATMENT OPTIONS** for patients...

...& **VALUABLE RESEARCH** for society.

But trial participation can present **UNEXPECTED COSTS** for patients.

Travel & transportation to trials sites

Meals

Time off of work

Lodging

Child care

Patients need:

Greater awareness of costs

Better access to reimbursement resources

Policies that allow for trial participant reimbursement

COST SHOULDN'T STOP PATIENTS from participating in clinical trials.
